

# ER Musician Custom Moulds & ER Earphones

## ELACIN ER Earphones

Turn your ELACIN ER custom-moulds into in-ear Monitors instantly!

- Cost-effective solution
- High quality sound
- Noise isolation
- Lower volume levels
- No need for new impressions if you already have ER custom-moulds

If you already own a pair of ELACIN ER Noise Plugs and also want to try in-ear monitors? Then look no further than the ELACIN ER Earphones!

Ideal if you want both hi-fidelity noise protection from concerts, etc and to hear your favourite music on your MP3.

The ER Musician's custom-moulds ensure excellent protection against noise that is too loud and, when you replace the filter with an ER Earphone, it turns into a high quality in-ear monitor system with the benefits of custom-made earpieces. This combo solution is also ideal for musicians, bands, sound engineers, and DJs who use one noise plug and one in-ear monitor at a time.

(Please note: ELACIN Earphone In-Ear Monitors require a pair of ELACIN ER Custom-moulds to use - special bundle price available).
